# ASUS DIGITAL SIGNAGE

## SE series — Professional Essential DISPLAY

The SE series signage display is built in a metal chassis with a professional LCD panel for long-lasting operation. It is robust, rigid, and durable with very good connectivity. The internal playback function can playback Microsoft Office documents as well as abundant media formats.

## Simply Plug 'N' Play for Stunning Audiovisuals

ASUS SE series feature 178-degree wide-view angle Full HD 1920 x 1080 panels for stunning visuals. With 450 & 500 cd/m2 brightness, making SE series ideal for semi-outdoor wall-mounted, shelved, or end-cap installations. An embedded ambient light sensor automatically adjusts display brightness depending on environmental conditions.

SE series has a built-in multimedia player that supports various video, audio, and image files, as well as Windows Office and PDF documents. It comes with 4GB of onboard memory, enough storage for most media files. The all-in-one design of the SE series makes it an ideal, cost-effective solution for any business. You can put it at a shop entrance, display window, or exhibition booth to entice customers with product and sales promotions. The embedded media player makes it easy for you to conduct boardroom presentations; there are also extensive connectivity options like DisplayPort, HDMI, DVI-D, and D-Sub for laptop users.

## Support for Numerous File Formats

ASUS SE series supports a wide Range of file formats. It's especially useful in the board room, allowing you to easily share your Microsoft Office and PDF files. It also comes with extensive connectivity options like Display Port, HDMI, DVI-D, and D-Sub for laptop users. solutions for any business.

## Industrial-grade Panel with Metal Chassis

Thanks to the industrial-quality LCD display modules that SE series has much higher durability than consumer -grade panels. This provides greater reliability and uninterrupted content delivery, making them the ideal solution where continuous operation and reliability are demanded.

## Powerful Built-in Speakers

The SE series features built-in twin 10W speakers to provide quality audio to accompany what's onscreen. Situated at the rear of the display, the speakers eliminate the need for external speakers while maintaining the streamlined profile of the SE series display.
